EDUCATION

Bachelor of Science in Computer Science

Arizona State University, Tempe, AZ

January 2022 – May 2026

Junior College of Science

Shri T.P. Bhatia College, Mumbai, India

GPA: 3.7

August 2019 – July 2021

SKILLS

Languages & Tools: Python, R, SAS, SQL (PostgreSQL, MySQL, SQLite), Excel (Advanced), Power BI, Tableau, Google Looker Studio, IBM Cognos, Git, GitHub, Jira, SharePoint, Microsoft Office Suite

Data Analysis & ML: Pandas, NumPy, scikit-learn, Matplotlib, Seaborn, Plotly, Statistical Analysis, A/B Testing, Feature Engineering, Customer Segmentation, Predictive Modeling, Data Visualization, ETL Pipelines, Data Quality, REST APIs

Frameworks & Automation: LangChain, Generative AI, Beautiful Soup, Web Scraping, Selenium WebDriver, Spring Boot, ReactJS, Apache Kafka, Tkinter

Core Competencies: Data Storytelling, Dashboard Development, KPI Tracking, Cross-Functional Collaboration, Stakeholder Communication, Agile Methodologies, Problem-Solving, Analytical Skills, Written & Verbal Communication

PROFESSIONAL EXPERIENCE

Associate Data Analyst — Arizona State University, Tempe, AZ

April 2023 – Present

- Developed **SQL-based ETL workflows** consolidating and validating **500+ student records** across multiple academic systems, improving data accuracy by **78%** by eliminating duplicate entries causing reporting inconsistencies.
- Built **interactive dashboards** tracking enrollment trends and student performance metrics across departments, improving student retention visibility by **40%** for academic leadership teams.
- Automated **monthly reporting pipelines** for student engagement and academic progress data, reducing manual reporting effort by **35%** and delivering consistent insights to **10+ stakeholders**.

Data Analyst Capstone Project — IBM / Coursera [\[GitHub\]](#) [\[Cert\]](#)

Spring 2026

- Engineered an **end-to-end analytics pipeline** on the 2024 Stack Overflow Developer Survey (**73,268 responses**), collecting data via **REST APIs** and BeautifulSoup scraping, cleaning **115 fields** using Python (Pandas, NumPy) and SQL/SQLite.
- Designed a **3-page interactive dashboard** in **Google Looker Studio** with **12 visualizations** surfacing insights on PostgreSQL dominance, AWS/GCP adoption, and fastest-growing developer skills (Rust, Go).
- Delivered **data-driven findings** through structured stakeholder reporting, identifying JavaScript as the leading current-use language and key technology adoption trends across **global developer communities**.

Data Analytics Intern — IT Quick Solutions, India

Summer 2025

- Built **Python & SQL ETL pipelines** processing **50K+ customer records** with Pandas and PostgreSQL, reducing processing time by **40%** through optimized query design and systematized cleansing.
- Developed **scikit-learn** and **SAS**-assisted segmentation models achieving **80% accuracy** via feature engineering, identifying key customer indicators and behavioral patterns for business strategy.
- Created **Power BI dashboards** tracking **KPIs** across customer trends, pricing, and utilization patterns, enabling **data-driven decision-making** for cross-functional stakeholders.

Data Analytics Virtual Intern — Deloitte Australia (Forage) [\[Link\]](#)

Summer 2025

- Designed **Tableau dashboards** analyzing **50,000+ performance records** from 4 manufacturing facilities, identifying operational correlations to reduce equipment failures by **15%**.
- Conducted competitive analysis on **5,000+ compensation records** using advanced Excel and **SAS** (pivot tables, regression, statistical analysis), identifying pricing benchmarks and presenting findings to executive stakeholders.
- Collaborated with **cross-functional teams** (finance, operations, IT) conducting **SQL queries** and building automated **SharePoint reporting workflows**, improving reporting accuracy by **25%**.
